
**SENSOR MEDICAL TECHNOLOGY ANNOUNCES LAUNCH OF
NEW DIAMOND LINE OF BI-ASPHERIC LENSES**

For immediate release

Maple Valley, WA – November 13, 2015

Sensor Medical Technology announced today the introduction of a revolutionary new line of bi-aspheric indirect lenses. The lenses offer a patent-pending optical design which minimizes distortions and places the narrowest ray bundle at pupil plane, thereby optimizing imaging through small pupils. This line includes:

- 90D lens
- 78D lens
- 60D lens
- 20D lens
- 28D lens

Sensor Medical's Diamond lenses have:

- an ultralight metal alloy ring, with design patent pending
- high performance multi-layered anti-reflection and hard coatings
- competitive prices at \$210 USD each

Additionally, Sensor Medical offers sterile, disposable lenses including 3 Mirror lens, 4 Mirror lens, Retina 90 lens, an industry leading Retina 180 lens, 20D and 28D lenses (supplied in boxes of 10 lenses for \$100 - \$130 USD) and disposable surgical lenses including a gonio prism and surgical wide field lens (each supplied in boxes of 10 lenses for \$255 - \$285 USD).

These lenses provide eye care professionals with pristine, scratch free, low cost lenses - perfect optics for each procedure.

About Sensor Medical Technology

Founded in 2006, and headquartered in Maple Valley, WA, Sensor Medical Technology is a global ophthalmic medical device company committed to providing innovative diagnostic, therapeutic and surgical lenses. Sensor Medical Technology has used its research and development expertise to bring low cost, high quality optics to the single use medical device market. These products are available worldwide through our independent distributor network and also direct in the USA.
