**SENSOR MEDICAL TECHNOLOGY ANNOUNCES LAUNCH OF  
STERILE SINGLE USE GONIOPRISMS**

For immediate release

**Maple Valley, WA – June 22, 2015**

Sensor Medical Technology announced today the introduction of a new sterile single use gonioprism, one of the featured lenses in a novel line of surgical lenses.

Sensor Medical's gonioprisms are:

- single use and presented in an individual sterile pouch
- designed for direct viewing of the angle during glaucoma surgery
- very competitively priced at \$25.50 per sterile lens (sold in boxes of 10 for \$255.00)
- configured for right hand or left hand

Sensor Medical offers other surgical products such as a wide field lens, vitreoretinal lenses with anti-reflection coating, 20D and 28D lenses, 4 mirror gonio lens with handle and single mirror lens with handle. These lenses retail between \$12.20 and \$28.50 each (supplied in boxes of 10).

Other single use lenses for the clinic include 3 Mirror, 4 Mirror, Single Mirror, Capsulotomy, Retina 90, and the industry leading Retina 180 lens (supplied in boxes of 10 lenses for \$100.00 - \$124.00 USD).

These lenses provide eye care professionals with pristine, scratch free, low cost lenses with perfect optics for each patient.

**Vault in endpoint for MIGS**

**About Sensor Medical Technology**

Founded in 2006, and headquartered in Maple Valley, WA, Sensor Medical Technology is a global ophthalmic medical device company committed to providing innovative diagnostic, therapeutic and surgical lenses. Sensor Medical Technology has used its research and development expertise to bring low cost, high quality optics to the single use medical device market. These products are available worldwide through our independent distributor network and also direct in the USA.
