**SENSOR MEDICAL TECHNOLOGY ANNOUNCES LAUNCH OF  
SINGLE USE SURGICAL WIDE FIELD LENS**

For immediate release

**Maple Valley, WA – June 30, 2015**

Sensor Medical Technology announced today the introduction of a new sterile single use surgical wide field lens, one of the featured lenses in a novel line of surgical lenses.

Sensor Medical's single use surgical wide field lens is:

- presented in an individual sterile pouch
- designed with an exceptional 155 degree field of view for indirect imaging of the fundus
- of small physical size ideal for surgery
- very competitively priced at \$28.50 per sterile lens (sold in boxes of 10 for \$285.00)

Sensor Medical offers other sterile single use surgical products such as vitreoretinal lenses, 20D and 28D lenses with anti-reflection coating, goniosprisms, 4 mirror gonio lens with handle and single mirror lens with handle. These lenses retail between \$12.20 and \$25.50 each (supplied in boxes of 10).

Other single use lenses for the clinic include a Retina 90, and the industry leading Retina 180 lens, 3 Mirror, 4 Mirror, Single Mirror and Capsulotomy lenses (supplied in boxes of 10 lenses for \$100.00 - \$124.00 USD).

These lenses provide eye care professionals with pristine, scratch free, low cost lenses with perfect optics for each patient.

**About Sensor Medical Technology**

Founded in 2006, and headquartered in Maple Valley, WA, Sensor Medical Technology is a global ophthalmic medical device company committed to providing innovative diagnostic, therapeutic and surgical lenses. Sensor Medical Technology has used its research and development expertise to bring low cost, high quality optics to the single use medical device market. These products are available worldwide through our independent distributor network and also direct in the USA.
