

**SENSOR MEDICAL TECHNOLOGY ANNOUNCES LAUNCH OF
STERILE SINGLE USE VITRECTOMY LENSES AND PRODUCTS**

For immediate release

Maple Valley, WA – July 16, 2015

Sensor Medical Technology announced today the introduction of sterile single use vitrectomy lenses and products; some of the featured lenses in a novel line of surgical lenses. This line includes sterile single use:

- Plano Lens
- Magnifier Lens
- Bi-Concave Lens
- 20 Degree Prism Lens
- 30 Degree Prism Lens
- Suture Ring
- Suture Ring with tabs
- Forceps

Sensor Medical's vitrectomy lenses and products are:

- single use and presented in an individual sterile pouch
- anti-reflection coated (unlike competitors' lenses)
- very competitively priced between \$17.40 – \$21.40 per sterile item (sold in boxes of 10 for \$174 – \$214).

Additionally, Sensor Medical offers a sterile, single use Surgical Wide Field lens. This lens retails for \$28.50 (supplied in boxes of 10).

Other single use lenses available include 3 Mirror lens, Retina 90 lens, the industry leading Retina 180 lens, 20D and 28D lenses (supplied in boxes of 10 lenses for \$100 - \$130 USD).

These lenses provide eye care professionals with pristine, scratch free, low cost lenses with perfect optics for each vitrectomy procedure.

About Sensor Medical Technology

Founded in 2006, and headquartered in Maple Valley, WA, Sensor Medical Technology is a global ophthalmic medical device company committed to providing innovative diagnostic, therapeutic and surgical lenses. Sensor Medical Technology has used its research and development expertise to bring low cost, high quality optics to the single use medical device market. These products are available worldwide through our independent distributor network and also direct in the USA.
